High value labels grow with the lucrative market of embellishments. The **330FB** is a precision, 50-ton pressure heavy duty, stamping and screen printing unit for production of high quality labels. The machine can do foil stamping, embossing and screen printing separately or in one pass.

The best way to impress consumers is the right combination of quality and beauty, and this is where the **330FB** flatbed hot stamp unit from Grafisk Maskinfabrik will help you out. The **330FB** is an innovative unit that will give your labels an impressive and unique look-and-feel. On the matter of the quality of hot stamping, the flatbed is the best choice, and on the matter of beauty, the FB330 can add intricate details of gold, silver or even holograms to your labels.

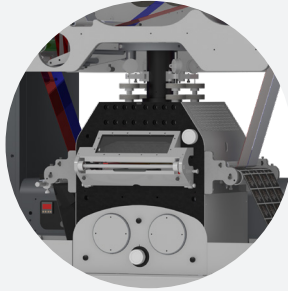

The **330FB** has been designed to serve all your needs for the production of premium quality labels. Advanced features such as foil saver, servo-register and electronic temperature control come as standard. In addition, in the basic configuration, we also provide two BST web-guides, which combined with the servo drive ensures perfect print alignment and excellent roll quality.
